

06 .Develop programs to learn regular expressions using python.

Name- Gaurav Sudhir Sapkale

Roll no. - 18

```
import re

pattern = '^a...s$'
test_string = 'abyss'
result = re.match(pattern, test_string)

if result:
    print("Search successful.")
else:
    print("Search unsuccessful.")
```

Output:

Search successful.
